

# Now Is the Time to buy

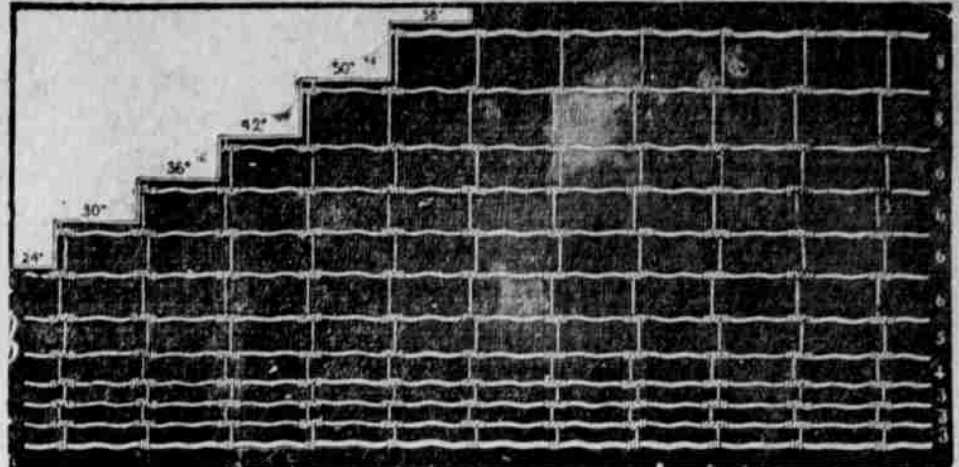

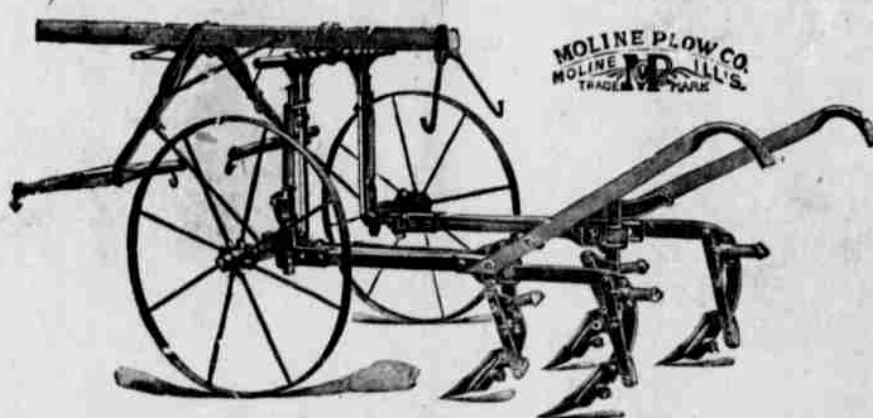

**I Have the Goods  
and the Prices  
and Want to Sell**

This is Cultivator and  
Sweep time. I have them  
in large quantities at prices  
that

**Only \$27.50**

Famous Ohio or Fremont Six Shovel Cultivators wood frame complete with shovels or sweeps, only \$27.50, steel frame \$35.00. This is the best sandy land ultivator made and sold. The price is cheaper than you have ever bought at. Come let us show you my stock. I also sell the standard, the Oliver, the Jno. Deere, the Texas King, the World's Famous Texas Surprise with no levers. I am in front with the best line of standard make ultivators, the kind that I will stand by with my life and money. I want you to come and let me show you.

**Defy ompetition**

**Pipe**

Deep Well Pipe. Just received one car of all sizes. When in need of Pipe, Pumps, etc., give me a trial. My stock is full and complete and my prices are as cheap as any one's.

Just received 200 dozen Eye Hoe Handles and Scovill and Lyndon Eye Hoes. It will pay you to get prices on these goods.

One car steel sweeps, shovels, bulltongues. I have the kind that everybody buys, come and see them.

I carry and sell galvanized, corrugated Iron Roofing. Make Galvanized Iron Cisterns, do all kinds of metal and Tin Work. I do sanitary plumbing. I want your business, let's get together.

**Thanking You With a Warm Heart, I Am Yours for Business**

## J. ALLEN MYERS

### SUGGESTIONS TO FARMERS

President Exall of Texas Industrial Congress Tells How to Cultivate Crops.

We suggest that you do not have your crop too thick. One good stalk of corn or cotton will produce more than two poor stalks. When your corn is fifteen inches high the small hair-like roots will almost meet between the rows. You should therefore cultivate as nearly level as possible. If you go deeper than two inches you will cut thousands of these roots and greatly damage your crop. Use a sweep or a very short toothed harrow that is narrow enough to go well between the rows. Pull up all weak plants, and destroy all suckers and weeds. These parasites suck the life blood from the plant, just as vermin do from livestock.

Plants like animals must have balanced ration with an abundance of nutritious food, if you expect the best results. The larger the plant, the more food it will need to assist it in its life work of producing and perfecting its crop. It is a very great mistake to lay by and leave the crop when it is one-half or two-thirds grown, and allow it to live on short rations, fight dry weather, suckers and weeds at the most vital period in its career.

To get the best and most profitable results, shallow mulch cultivation should continue until the grain and cotton are fully matured. If it is possible to do so well-rotted manure, cottonseed meal or any other good fertilizers that are easily soluble should be spread between the rows of corn and cotton, and worked into the soil top mulch a short time before the crop begins to fruit. A cottonseed planter with fertilizer attachment set to run very shallow does this work fairly well, or you can do it by hand.

If you can not apply these fertilizers you certainly can destroy the suckers, weeds and weak plants, and by constant shallow mulch cultivation keep the earth from cracking and thereby conserve the moisture, warding off to a great extent the damaging effects of hot winds and a dry season. The dryer it is, the more unpromising things seem to be, the greater necessity for constant work. Keep the weeds down, suckers out, the top of the earth soft, and you will raise a crop any way.

Guard against damage to land from washing by terracing and contour plowing, going around rather than up and down a slope.

HENRY EXALL,

President Texas Industrial Congress.

### DIAZ'S PLENIPOTEST

**HAVE FULL AUTHORITY**

If He Comes Not So Accredited Insurrectos Will Not Treat with Him.

[By Associated Press.]  
El Paso, Texas, May 1.—Whether the peace terms will be agreed upon by the end of this week appears to depend on whether Judge Carabaja, the government's peace envoy who is due to arrive tonight, comes with full authority to act for President Diaz. If he is not so accredited the insurrectos says they will not treat with him.

**TRICK DIDN'T WORK**

Ingenious Method of Beating Railroad, but It Failed.

[By Associated Press.]  
Waco, Texas, May 1.—A man named Myers was caught in a box being shipped by express from Lawrence, Kan., to Galveston, Texas, because he had not enough money for the fare. The box was round-topped so it could be so placed that he would not stand on his head.

The express messenger caught sight of his eyes peering through a slit and put him off the Katy train at Fort Worth.

### McMANIGAL'S WIFE

**TO BE A WITNESS**

[By Associated Press.]  
Los Angeles, Cal., May 1.—The wife of Ortie McManigal is expected to be one of the prosecution's witnesses in the dynamiting case against the McNamaras, who are charged with dynamiting the Los Angeles Times building. McManigal is alleged to have made a confession, implicating himself and the McNamaras in that and many other cases of dynamiting.

### "COUNTY FAIR" POSTPONED.

"The County Fair," the home talent entertainment to be given under the auspices of the Civic League, which was to have been put on the boards tomorrow night, has been postponed on account of the inclement weather until next Tuesday night. Rehearsals will continue and the show will be given on the above named date.

### FOSTER'S WEATHER BULLETIN

Washington, April 29.—(Copyrighted, 1911, by W. T. Foster.)—Last bulletin gave forecasts of disturbance to cross continent April 27 to May 31, warm wave April 26 to 30, cool wave April 29 to May 3. This is expected to be one of the most important disturbances of the year, covering a period of ten days, including April 27 to May 6. No very definite forecasts can be made of that period. These great disturbances will be of such immense force that our experience with them has not yet enabled us to forecast them in detail and particulars. About all that can be safely said is to advise all to be on the lookout for bad and dangerous weather events.

This great disturbance broke loose a little earlier than expected and earthquakes occurred in Italy on April 10 and disastrous storms at St. Louis and further west on April 12 and 13. These premature storms and earthquakes may relieve the tension and lessen the force of those expected April 27 to May 6.

Next disturbance will reach Pacific coast about May 2, cross Pacific slope by close of 3d, great central valleys 4th to 6th, Eastern sections 7th. Warm wave will cross Pacific slope about May 2, great central valleys 4th, Eastern sections 6th. Cool wave will cross Pacific slope about May 5, great central valleys 7th, Eastern sections 9th.

This disturbance will include a period of notable weather events. The storm forces will be so strong that it will be beyond any art to give definite advice as to the places where and the hours when they will strike. It is not a pleasure, but I feel it to be a duty to warn all that destructive storms are more than probable as this disturbance crosses the continent. If my forecasts extended to countries where earthquakes are somewhat frequent I would urge all to be on the lookout for such during the dates assigned to this storm period. Temperatures for this storm period are expected to average above normal, but its closing hours will bring a great drop in the thermometers.

Third disturbance of May will reach Pacific coast about 8th, cross Pacific slope by close of 9th, great central valleys 10th to 12th, Eastern sections 13th. Warm wave will cross Pacific slope about May 8, great central valleys 10th, Eastern sections 12th. Cool wave will cross Pacific slope about May 11, great central valleys 13th, Eastern sections 15th.

The salient features of this storm

wave will be the closing out of the severe storms and the unusually cool weather. Its temperatures will average much below normal and frosts are expected to go further south than usual. Its weather events will be somewhat radical, but not dangerous. Rainfall will be in excess in some Eastern sections near parallel 38. General trend of temperatures will be downward till after middle of May.

### Science Notes.

The National Academy of Sciences held its annual session in Washington, April 18-21. The most interesting event was a lecture delivered by Sir John Murray, of Scotland. For several years he has been the director of the ship Challenger investigating conditions in the ocean depths. His researches have revealed the immensity of animal and vegetable life from its surface to its vast depressions, some of which are nearly six miles in depth. He showed that the great permanent high barometers, where the atmospheric movements are circular, downward and cool, are over the deep parts of the oceans, and that the accumulations of matter in these great depressions—the filling up of these great holes—is exceedingly slow.

He differed with the national weather bureau theories and claimed that the circular motion of waters in the five great oceans is caused by the atmospheric circulations, while the weather bureau officials claim that it is the circular movements of the great ocean waters that cause the atmospheric circular motions of the permanent highs over the oceans.

### A PECULIAR CASE.

Woman Awarded Damages Because Skirt Did Not Fit.

Spokane, Wash., April 28.—When a jury in Judge Huneke's department of the Spokane county superior court said in a verdict that the skirt of a \$75 suit, built for Elsie Spangenberg by Madame Campbell, did not fit, a precedent was established. The jurors also awarded damages to the extent of \$75 to the plaintiff and held the modiste for the costs of the trial, a matter of more than \$100.

Miss Spangenberg donned the offending garment several times during the hearing, while a score of tailors, drapers, dressmakers and employees of suit houses testified for and against the defendant. Counsel for the defense is not satisfied with the verdict and will appeal to the supreme court of the state of Washington. Meanwhile, Miss Spangenberg is being lionized for her pluck in fighting the case.

### PATENTS TO TEXANS.

Jack A. Schley, United States patent attorney of Dallas, announces the issuance of the following patents to Texans:

Silas Ballard, Abilene, elevator.

David B. Buttrill, Fort Worth, combined scraper and fender attachment.

Andrew J. Gibbins, Mountain Home, wire stretcher.

Ernest F. Greefe, Cisco, poultry and animal fumigating device.

Virgil L. Helm, Fort Worth, advertising machine.

Thaddeus E. Huffman, Royston, sash balance and lock.

Samuel L. McBurney, Bonham, steam radiator.

Sam Miller, Georgetown, ditching machine.

Eduard F. Mueller, Caldwell, engraver's tool.

Charles H. Seabrook and W. R. Duff, Teague, draft construction for frame railway cars.

Houston H. Swindle, Temple, plow point mount.

Winfield B. Williams, Waxahatche, receptacle clamping device.

### CALVERT ORGANIZED BUSINESS MEN'S LEAGUE.

As published in The Eagle some time ago, Mr. E. J. McGuirk, of Calvert, made a visit to Bryan to investigate the workings of the local Commercial Club, in order to secure data that would help in the organization of a similar club in Calvert. On Monday night the business men of that city met and organized a business men's league with a membership of one hundred and five. Following are the officers and directors elected:

President—C. P. Jones.

Vice Presidents—Emile Conitz, Carl Sommers.

Treasurer—R. H. Proctor.

Directors—W. S. Anderson, C. S. Allen, E. J. McGuirk, C. P. Jones, S. M. Gibson, James Adoue, W. E. Taylor, J. J. Lauderdale, Emile Conitz, Carl Sommers, P. T. Norton, Seth Burnett, Sam Pierce, L. S. Casimir.

The Eagle is glad indeed to note this forward movement by one of its neighboring towns. It will help in building up this section of the state.

### THE MARLIN BATHS.

Marlin, Texas, March 1, 1911.

Marlin Commercial Club, Marlin, Texas:

Gentlemen—I have been a sufferer from chronic rheumatism for more than a year, gradually growing worse until finally I was so bad I could not turn over in my bed without someone

helping me. My limbs were drawn and all my joints were so full of pain I could not use them. I went to Marlin on the 12th of February. I was so bad I had to be carried on and off the train and had to be carried to my first bath. In three days I was able to discard my crutches and the pain was very much better. From then on I continued to get better until after two weeks I was able to go home a well man.

I should be glad to advise anyone in my condition to go to Marlin.

Yours truly,

(Signed) L. C. ENGLISH.

### KEEP ON THE SUNNY SIDE

The silver lining of your clouds may be a bit tarnished, but laughter will polish them up.

When you get that grouchy feeling, stop and think how glad you are that you live in Bryan.

The sunny side is made by the sunshine of joy, which is laughter.

A kind word and a merry laugh float into the souls of men like sunbeams and bring light into the shadows.

A sure remedy to use when you take a hand in another's business is broth, hot water drinks and a mush poultice, eaten off the mantelpiece.

When the calf gets in the garden, and the cow eats up the corn;

When you stay in the field till one o'clock, not nearing the dinner horn,

Don't fuss and cuss and worry, but be happy all the while;

Wipe the sweat from off your forehead and smile a six-inch smile.

When Beck kicks out of the traces and rakes you on the shin,

And it's just about the time of year when the boll weevils begin,

Don't fuss and fume and worry in pessimistic style;

Just sit right down and rest awhile, and smile that six-inch smile.

It's easy to be happy and smile instead of frown;

You can be the jolliest guy of all within this jolly town.

So doff the cloak of sorrow, don the robe of joy awhile;

Shake hands with everyone you meet, and smile that six-inch smile!
